EXPERIENCE

Clinical Ink - Horsham, PA

Product Designer - September 2015 to Present

- Creating wireframes, user flows, prototypes and high-fidelity designs
- Maintaining user experience standards and best practices throughout our platform
- Creating and maintaining style guidelines across our products on web, Android and iOS devices
- Conducting user research and usability testing to gauge the success of new features and discover pain points throughout our platform
- Collaborating effectively with product managers, engineers, and other designers to seamlessly execute product vision
- Communicating the thinking behind design decisions and the impact they have on project goals
- Translating business requirements into elegant and thoughtful design solutions

Practising Law Institute - New York, NY

User Experience Designer - April 2013 to September 2015

- Created the visual appearance of all new features and enhancements across all products
- Developed wireframes and prototypes to work out complex workflows
- Designed email templates, digital ads, and landing pages for all new marketing initiatives
- Improved the user experience on all marketing web sites through research and analytics
- Implemented new programming technologies to ensure that browser and mobile viewing was optimized
- Executed a company wide redesign using A/B and usability testing
- Oversaw all aspects of email deployment from designing, drafting, development, and deployment through IBM Unica
